

## Factsheet

### Specification

#### Investment goal

The investment goal is to achieve a high asset protection in the medium to the long term, especially when faced with financial and currency crisis as well as tendencies to monetary depreciation. In the interest of the investor, the Fund strives to maintain and increase the purchasing power of the capital invested.

As the Fund has its domicile and warehouse of the precious metals in the Principality of Liechtenstein, the Fund can consequently ensure a high level of property security.

#### Investment strategy

The fund buys, holds and stores the majority of the fund's assets in physical gold and physical silver, complemented by smaller investments in other high-quality metals (e.g. platinum, rhenium or ruthenium) in physical form. The Fund deliberately abstains from using derivative investment instruments.

#### Specific aspects

##### Value added tax (VAT)

The Fund has organisational structures that authorize the purchase of physical white metals (e.g. silver) without the burden of value added tax.

##### Physical redemption

When redeeming fund units, the investor may request delivery of physical gold and silver.

### Key figures / AIF (Alternative Investment Fund)
